

Pod Plus newsletter

In Pod plus we have had a good start to the term working hard on our new geography topic of Raging Rivers where the pupils have been learning about the features of rivers, the water cycle, erosion and deposition and the force of rivers.

The pupils have also been learning about the circulatory system in science which has consisted of them finding the function of different parts of the body as well as understanding how exercise and a healthy diet effects the body.

In English we have been learning about film characters, heroes and villains and understanding the characteristics they have. We have created our own film villains as well as our own film front cover and information.

We have covered addition, subtraction, multiplication and division as well as order of operations in maths and the pupils have been working hard to solve problems in these areas.

The pupils have also produced some fantastic work in art, learning new techniques with clay, sculpting metal sheets and looking at trainer designs. From these designs the pupils have created canvas art pieces which will take pride of place around the school.

Lastly, the pupils have been taking great delight in showing the staff how dodgeball, basketball and archery should be done with pupils performing and showing amazing skills and performance.

Cookery is also going well with pupils making pizza bread, brownies, cakes and helping with the cooking. We may have some Gordon Ramsey's in the making.
